

# s.26 DZR extended stem full port 3/8" - 2" dezincification-resistant hot forged ball valves

Several governmental authorities recommend use of special alloys for valves handling water in areas where there is a problem of dezincification. RuB CR valves are designed to meet such requirements.

Through the use of new technology these valves retain the reliability and competitiveness of brass, but are comparable to bronze in corrosion resistance.

Be kind with yourself, make sure the valve that brings you pure fresh water is an RuB CR valve.

## Features and Specifications:

- Hot forged sand blasted DZR unplated body and cap sealed with Loctite or equivalent threads sealant
- Extended stem forged in one piece with body allows perfect sealing and easy operation when valve is isolated
- Valve design and construction approved by Danish Board of European Technical Approval for Construction products (DK), Byggforsk (N), VTT (SF), Swedcert (S) and SISIR (Singapore), GOST-R (RU), Hygenic (RU), ROSTEKHNADZOR (RU), UkrSepro (U)
- Dezincification Resistant ADZ-T and ADZ-P brass approved to SBN-PFS 1983:2 and NR-BFS 1988:18 specifications
- Full port to DIN 3357 for maximum flow
- 24h 100% seal test guaranteed
- Pure PTFE self-lubricating seats with flexible-lip design
- Dual sealing system allows valve to be operated in either direction making installation easier
- Chrome plated DZR brass ball for longer life
- Blowout-proof unplated DZR brass stem
- Two FPM O-rings at the stem for maximum safety
- Handle stops on body to avoid stresses at stem
- Handle removable with valve in service
- Geomet® carbon steel handle with thick PVC dip coating
- Handle clearly shows ball position
- ISO 228 Female by Female threads
- Silicone-free lubricant on all seals
- 30 bar (Kg/cm<sup>2</sup>) non-shock cold working pressure
- Range: -40°C +170°C temperature (Warning: freezing of the fluid in the installation may severely damage the valve)

## Options:

- CW617N brass body and components
- Short stem design
- T-handle, oval lockable handle
- AISI 430 stainless steel handle
- Patented locking device.

## Upon request:

- AISI 316 stainless steel ball,
- Glass filled PTFE seals,
- Custom design.

## Approved By:

**NOTE: Approvals apply to specific configurations only.**

The product described in this document meets the requirements of PED Directive 97/23 and according to art.3 par.3, it does not require CE marking: it cannot be used with dangerous gases in sizes larger than 25mm; it cannot be used with non-dangerous gases in sizes larger than 40mm.
