

PM-produktserien – metriske rørmål

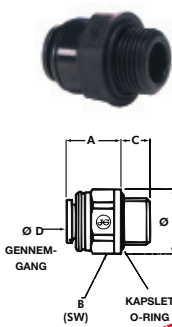

PM-produktserien til metriske rørmål er fremstillet i sort acetalpolymer samt forsynet med en levnedsmiddelgodkendt nitril-O-ring. Produktserien er især velegnet til medier, som f.eks. luft samt inerte gasarter og kan ligeledes bruges til N₂/CO₂. Derudover er produkterne i PM-serien velegnet til pneumatik- og vakuumsystemer i forskellige industrisammenhæng.

Tekniske oplysninger, se side 26 + 27.
