

R.P.E. SRL

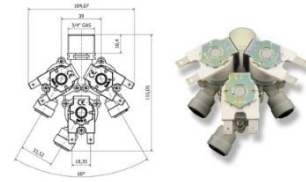

SOLENOID VALVES MANUFACTURER

R Universal Series

More than 40 years of experience...

2

since 1971

- RPE was founded in 1971, from the idea of the visionary founder and current president Giuliano Ravazzani.
- By Company operating in the fields of electrolocks and programmers for washing machines, in some years the adventure begins in the world of solenoid valves.
- Before 80's plants were equipped with injection molding machines for printing, with winders and transfer for assembly and testing.
- It is the beginning of a great productive development.
- Today RPE is a benchmark in the international market for solenoid valves, this is also thanks to the continuous evolution in the world of food and electrical certifications.

Quality made in Italy

FABBRICATO
INTERAMENTE IN ITALIA

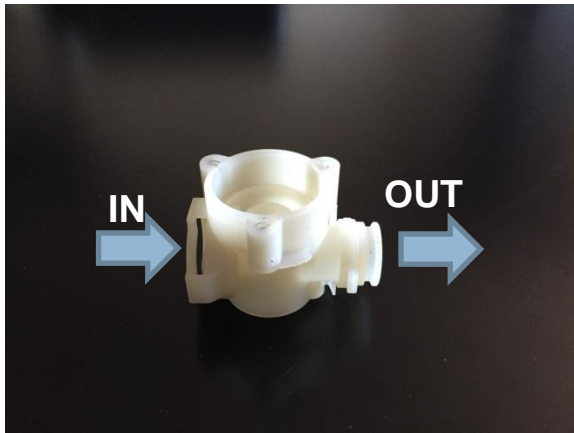

3

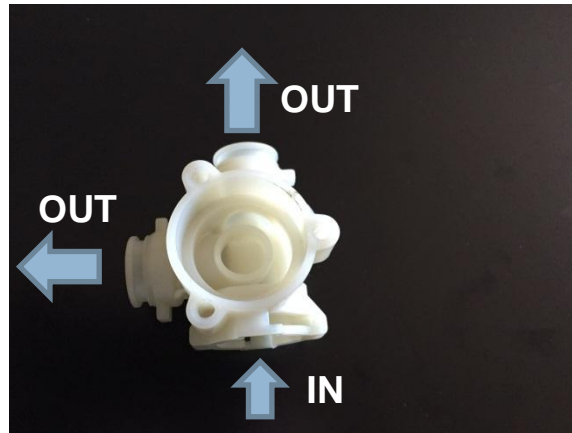

- RPE's products are 100% made in Italy.
- All of our valves & solenoids are in fact designed and manufactured in our modern factory of Carbonate (CO).
- Our goal is to always be in the vanguard of technical research and provide the best solution, in terms of performance, durability and innovation to all our customers.

- Each element is 40mm long, this gives you the opportunity to connect the different fittings.
- Each body can be a seat for all the element produced by RPE, that is the coil, the pressure reducer, the flowmeter, the filter, the cap and the thermo stat.
- All RPE materials with food approval.
- Each body and fitting can be combine to infinity, to create compositions with different components, different outlets and geometries.

Manifold assembled
