Application
The Toftejorg SaniMagnum is an efficient replacement for traditional static spray balls as it uses low volumes of liquid at low pressure. The device, particularly well-suited to hygienic applications, can be used in tanks ranging from 5 m³ to 50 m³.

Working principle
The flow of the cleaning media causes the head of the Toftejorg SaniMagnum to rotate, with fan jets laying out a swirling pattern throughout the vessel. This generates a vibrating impact and cascading flow that covers all internal surfaces of the tank or reactor. The device's self-cleaning feature is achieved by directing the cleaning media through the rotating bearing track and onto the neck of the elongated head.

TECHNICAL DATA
Lubricant: ................. Self-lubricating with the cleaning fluid
Wetting radius: ............. Max. 3 m
Impact cleaning radius: ...... Max. effective 2 m

Pressure
Working pressure: .......... 1-3 bar
Recommended pressure: .... 2 bar

Spray Pattern
360°
270° up
180° down

Standard Design
As standard documentation, the Toftejorg SaniMagnum can be supplied with a "Declaration of Conformity" for material specifications or 3.1 certification for metallic parts. Conformity of Declaration ATEX available on request. The device is available in hastelloy C22 (balls in hastelloy C276) with 3.1 certification for metallic parts. ATEX approved, Category 1 for installation in zone 0/20.

Certificates
2.2 material certificate, Q-doc, Q-doc incl. FAT & SAT and ATEX.

internal + Electro polished: ... Ra 0.5µm

Temperature
Max. working temperature: .... 95°C
Max. ambient temperature: .... 140°C

Weight
Thread and clip-on: .......... 0.76 kg
On pipe: ........................ 0.97/1.52 kg

Connections
- Thread: 1 1/4" or 1 1/2" Rp (BSP) or NPT
- Weld-on: 1 1/2" or 2" ISO 2037, or DN40 DIN11850-R2, or 1 1/2" or 2" BPE US
- Clip-on: 1 1/2" or 2" ISO 2037, or DN40 DIN11850-R1 or R2, or 1 1/2" or 2" BPE US
Qualification Documentation (Q-doc)

Designed for the BioPharm and Personal Care industry for qualification of hygienic Tank Cleaning Machines. Developed in accordance to the ISPE V-model and GDP, Good Documentation Practice, and includes:

- RS (Requirement Specification);
- DS (Design Specification incl. Traceability Matrix);
- FAT (Factory Acceptance Test incl. IQ & OQ);
- 3.1 and USP Class VI Certificates;
- FDA Declaration of Conformity;
- TSE Declaration;
- QC Declaration of Conformity;
- SAT (Site Acceptance Test Protocol incl. IQ & OQ) for End-User Execution.

Fast, Hygienic Cleaning

Alfa Laval TJ SaniMega Rotary Spray Head

Application

The Toftejorg SaniMega rotary spray head provides a controlled rotating fan impact cleaning action. It is an automatic device with an optimised design for effective distribution of cleaning media. The Toftejorg SaniMega is suitable in processing and storage tanks ranging from 0.5 to 350 m³. It is particularly suited to vertical storage tanks in the food, brewing and other beverage industries where a scrubbing effect is needed to clean at the fill level.

Working principle

The flow of the cleaning media causes the gear unit to rotate the body of the cleaning head. The resulting fan impact jet provides a swirling action down the tank wall.

TECHNICAL DATA

Lubricant: Self-lubricating with the cleaning fluid
Effective cleaning radius: 3 m
Pressure
Working pressure: 2-4 bar
Recommended pressure: 3 bar
Spray Pattern

270° up

Standard Design

Downpipe length 1,200 mm. CIP inlet connection 2" clamp. Tank connection 3" clamp. As standard documentation, the Toftejorg SaniMega can be supplied with a “Declaration of Conformity” for material specifications.

Certificates

2.1 material certificate

PHYSICAL DATA

Materials

316L (UNS S31603), PEEK, EPDM

Standard connection: Inlet: 2" ISO clamp
Tank: 3" ISO clamp
Standard downpipe length: 1,200 mm
Min. tank opening: ø72.5 mm

Standard Surface finish:
Product contact parts: Ra 0.8µ
Non product contact parts: Ra 1.6µ

Temperature

Max. working temperature: 95°C
Max. sterilisation temperature: 140°C
Max. ambient temperature: 140°C

Weight: 6 kg

Options

A. Rotation sensor
B. Counter parts to the standard clamp connections, including gaskets and clamp rings

Low Flow Saves on Water and Chemicals
Alfa Laval TJ SanMicro Rotary Spray Head

Application
The Toftejorg SanMicro is a rotary spray head that uses cleaning media to provide coverage and impact. The device represents an effective alternative to traditional static spray balls because it uses low volumes of cleaning fluid at low pressure. The double ball bearing in the Toftejorg SanMicro's rotating head makes the device suitable for all industrial cleaning applications, including tanks, reactors, vessels and other containers ranging from 0.05 to 1 m³, depending on dimensions and cleaning task.

Working principle
The flow of the cleaning media causes the head of the Toftejorg SanMicro to rotate, and the fan-shaped jets lay out a swirling pattern throughout the tank or reactor. This generates the impact needed for the efficient removal of residual product; the cascading flow covers all internal surfaces of the vessel.

TECHNICAL DATA

| Lubricant: | Self-lubricating with the cleaning fluid |
| Wetting radius: | Max. 2.5 m |
| Impact cleaning radius: | Max. effective 0.6 m |
| Pressure |
| Working pressure: | 1-3 bar |
| Recommended pressure: | 2 bar |

Spray Pattern

- 360°
- 270° up
- 180° down

Standard Design
As standard documentation, the Toftejorg SanMicro can be supplied with a "Declaration of Conformity" for material specifications or 3.1 certification for metallic parts. The device is available in an electropolished version as well as in hastelloy C22 (balls in hastelloy C276) with 3.1 certification for metallic parts.

Certificates
2.2 material certificate, Q-doc, Q-doc incl. FAT & SAT and ATEX.

Does not interfere with production

Alfa Laval TJ SanMidget Retractor, A Retractable Rotary Spray Head

Application
The Toftejorg SanMidget Retractor is installed where fully automated and validated cleaning can assure higher productivity due to less cleaning time in e.g. spray drying applications within the food, ingredients and pharmaceutical industry. Larger ducts, channels, cyclones, chambers, complexed reactors, vent lines etc. can therefore be cleaned to the highest standards with no manual or semi automated interference, and avoiding any product carry over or hazardous incidents.

Working principle
The Toftejorg SanMidget Retractor is available with two styles of retracting mechanisms: Pneumatic Driven, which uses air pressure to extend and retract the cleaning head, and Media Driven, which uses the pressure of the cleaning media to extend the cleaning head and an integrated spring to retract it. The Rotary Spray Head creates a fan of fluid in a swirling pattern. The distribution pattern of the cleaner head generates a vibrating impact as well as cascading flow coverage of all internal surfaces of the tank.

TECHNICAL DATA

Flow rate: .................... 7.3 m³/h at 3 bar
Standard strokes: .......... 100, 150 or 250 mm
Lubricant: .................... Self lubricating with cleaning media
Impact cleaning radius: ........ Max. Effective 1.7 m
Air quality:
Clean, filtered: ............ max. 40 µm
Dry, dew point: ............. max. 10°C
Installation: .................. Please contact Alfa Laval for installation of tank cleaning machine

Certificates
2.2 or 3.1 material certificate or ATEX.

PHYSICAL DATA

Materials
Product area: ............... 316L (UNS S31603), PEEK*
Non-product area: .......... 304 (UNS S30400), POM
Sealing: ...................... EPDM*
* FDA compliance 21CFR§177

Surface finish:
