

# Laboratory-/Industry- Pump GLP 25 <sup>CE</sup>

**innovative – flexible – economic**

**Hand pumps are out!**

**The solution is:**

## Laboratory/Industry Pump GLP 25.

Your **ideal** helper for clean and safe liquid transfer from small containers up to 220 litre drums (max. 160 W, 0-20 l/min).

**Several** pump tubes can be used with a **single** pump motor.

Various media such as undiluted acids and bases, colours, emulsions, dispersions, suspensions and low-viscosity liquids can also be measured out without any problems. Wetted materials: PP, stainless steel, Viton®.

Recommendation: only small amounts of dense and high-viscosity liquids should be pumped.

Flammable liquids can only be pumped if special laboratory conditions are observed.

*Splash-free filling is guaranteed*

*Different pump tubes, easily removable – time-consuming rinsing and cleaning is no longer necessary*

*Connect the motor to the pump tube of your choice with the simple click-in technique*

**Accessory:  
Nozzle**
